FIBRE INTERNET ACCESS

SEACOM

Fibre Internet Access

SEACOM's Fibre Internet Access Service provides customers with access to the Internet via SEACOM's global high-speed data network and is delivered directly to the customer's premises using last-mile fibre connectivity.

Service features:

- / Bandwidth Plans: Up to 1 Gbps
- / Symmetrical: Upload & Download speeds are at chosen line rate
- / Uncapped: Unlimited data usage
- / Unshaped: No rate-limiting of any protocols, which ensures maximum usage at all times
- / Customer Premises Device: Included
- / IP Address: /29 for IPv4 (8 addresses) & /56 for IPv6 (virtually unlimited addresses)

Technology

The Fibre Internet Access Service is provisioned across SEACOM's robust global IP/MPLS network, which is interconnected to major Partners across Africa and Europe. The network provides low latency access to major CDN caches, and offers a high speed, unshaped and symmetrical Service with bandwidth up to 1 Gbps. Our Fibre Internet Access Service provides a cost-effective, high-availability connectivity solution, right to your business.

Why choose SEACOM?

- / High-Speed fibre based service from a pioneer in the African Internet
- / Uncapped Bandwidth
- / Full Symmetrical service
- / Resilient meshed terrestrial & subsea cable system backbone
- / Rapid capacity upgrades
- / Flexible bandwidth plans
- / Reliable and secure service backed by SLD's – 99.9% availability
