INFRASCALE ONLINE BACK-UP

SEACOM

Infrascale Online Back-up

Back up your smartphones, servers and everything in-between with SEACOM's Infrascale backup service, a purpose-built solution for massively scalable endpoint coverage.

SEACOM's Online Backup solution enables organisations of all sizes to recover from data loss, corruption and disaster, quickly, easily and affordably through intelligent software.

Key Product Features:

- / In-Country hosted service for faster backups and quicker recovery
- / Scalable – Increase storage space for backups as and when required
- / Granular recovery – Select required individual items to recover from the backup
- / User-intuitive management dashboard
- / Unique military-grade double-blind data encryption system
- / Pay-as-you-go subscription model
- / One solution to protect all your data

Why choose SEACOM?

SEACOM provides a one-stop solution to back up any device such as your desktop, laptop, mobile device, or physical and virtual server. From a user-intuitive management dashboard, recovery can be initiated within minutes, restoring files, folders, applications, servers as well as virtual machines. Support is provided for more than 100 versions of Operating System and includes back up for SQL, Exchange, SharePoint and Windows environments. In addition, SEACOM's solution uses a unique military-grade double-blind encryption system for data security.
